SUMMARY

Full-stack software developer with expertise in front-end and back-end development, experienced in leading cross-functional teams.

WORK EXPERIENCE

Aug 2022–Feb 2023

– Web Developer-Intern (Numeric Infosystem Pvt. Ltd.) —

- Work with front-end and back-end developer teams to write logic according to their requirement and manage their application database
- Engineered a robust API in Express and Node.js, enabling seamless data retrieval from a MySQL database, leading to a 25 percent reduction in front-end loading time and an improved user experience.
- API Integration: Learned to integrate APIs into web applications, broadening the functionality and interactivity of projects.
- Continued Learning: Demonstrated a commitment to continuous learning by staying updated with the latest web development trends, tools, and best practices to improve skillset and contribute effectively.

PROJECTS

Project's

Gwalior Basket
It is an e-commerce web application. I built this application in React JS, like Flipkart and other shopping platforms. It is a shopping platform, and its name is Gwalior Basket.
Technologies: React JS, Java Script, Material UI, SQL, Others and Back-end Node JS technologies.

Razorpay Clone. (Personal Project)
In this, I build a Razorpay clone. which is almost similar to its original; it is mostly built with the help of tailwind.css for frontend project
Resource utilizes: HTML, CSS, tailwind CSS, JavaScript
