Experience

D Table Analytics

Jan 2026 – Present

Application Developer (MERN)

Bhopal

- Developed and maintained enterprise ERP applications for manufacturing and business operations, including Procurement, Inventory, Production, Quality Control, Dispatch, and Finance workflows.
- Built advanced data-driven interfaces using React.js, TypeScript, Redux, and REST APIs with dynamic tables, filtering, search, pagination, reporting dashboards, and Excel import/export features.
- Implemented role-based dashboards, protected routes, JWT authentication, reusable UI components, and multi-user workflows for Admin, Production, QC, Sales, and Inventory teams.
- Worked on business modules such as Purchase Orders, Vendor Follow-Ups, Delivery Verification, Payment Tracking, Order Entry, Production Entry, and Material Tracking to reduce manual operations.

EcoDigitas

Aug 2024 – Jan 2026

Frontend Developer

Hybrid

- Built complex frontend applications using React.js and TypeScript with dynamic filtering, modals, pagination, responsive layouts, and reusable component architecture.
- Worked extensively with Formik and Yup to implement form validation, conditional fields, dynamic form behavior, and clean user input flows across business modules.
- Implemented state management, protected routing, session handling, and JWT-based authentication for secure multi-role dashboard applications.
- Integrated SheetJS for Excel handling and OCR-based invoice auto-fill features to improve automation and reduce manual data entry errors.

Numeric Infosystem Pvt. Ltd.

Aug 2022 – Feb 2023

Full Stack Developer Intern

Gwalior, Madhya Pradesh

- Developed and optimized RESTful APIs and improved MongoDB query performance for faster data retrieval.
- Integrated third-party services including payment gateways and handled secure transaction flows.
- Implemented secure user authentication using JWT and OAuth to improve application security.
- Identified and resolved full-stack bugs to enhance system stability and performance.

Projects

Sparsch GPT | React 19, Redux Toolkit, React Router, Tailwind CSS, Vite, Axios

(Link)

- Built the frontend of a multi-tenant AI-powered platform combining a Support Engine with contextual AI chatbot functionality and a Learning Management System.
- Developed real-time AI chat interfaces with markdown rendering, reusable UI components, sidebar navigation, modals, notification panels, and role-based dashboards.
- Implemented four-tier access control for SuperAdmin, Admin, Client Admin, and Client User using protected routes and secure frontend workflows.
- Built LMS features including course catalogs, video/PDF content players, MCQ assessments, descriptive assessment interfaces, batch assignment, and company onboarding workflows.

Grabspace CRM | React.js, TypeScript, React-Bootstrap, TanStack Table

(Link)

- Built a dynamic Lead Management CRM using React.js, TypeScript, and TanStack Table with advanced filtering, sorting, pagination, and search functionality.
- Implemented secure role-based access and protected routes using Context API, improving data access control and user-specific dashboard views.
- Integrated Excel import using SheetJS and OCR-based invoice auto-fill to streamline data entry and improve operational efficiency.

Technical Skills

Languages: JavaScript, TypeScript, HTML, CSS, C/C++

Frontend: React.js, Redux, Redux Toolkit, React Router, Tailwind CSS, Bootstrap, Material UI, TanStack Table

Backend: Node.js, Express.js, NestJS, RESTful APIs, JWT Authentication, MVC Architecture

Databases: MongoDB, MySQL

Tools & Technologies: Git, GitHub, VS Code, Postman, npm, Vite, Axios, SheetJS

Education

ShriRam College of Engineering & Management

July 2020 – June 2024

Bachelor of Engineering (B.E.) in Computer Science, Honours; GPA: 7.65/10

Banmore, Madhya Pradesh
